

# K45 | DIRECT SNAP-FIT RANGE

Direct  
Snap-Fit

**Self-extinguishing, halogen-free materials:**  
A guarantee of safety for persons, equipment and information.

**Compatibility** with all the Voice, Data and Multimedia connectors on the market.

**More compact designs** allowing the installation of more mechanisms.

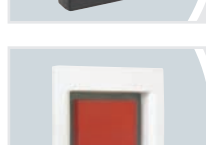

**Quick installation.**  
The mechanisms of the K45 range are installed by direct snap-fitting without using any tools.

## K45 TELEBLOCK

Raise your connections to the highest level

WIFI AREA

OFFICES

HOTELS

AUDITORIUMS

MEETING ROOMS

The Simon Connect K45 TELEBLOCK offers solutions for sporadic connection requirements, adapting to all kinds of furnishings.

### ➔ Automatic elevation

Provides a unique technological avant-garde appearance

Manual elevation also available

### ➔ With all necessary equipment

The K45 Teleblock section is supplied with one blind cover, two half-mechanism blind covers, metal divider plate, insertion ring (with push-pull or gas cylinder), fixing thread and all necessary hardware for installation.

(The cover and the trim frame are supplied separately).

Mechanisms, electrical sockets and plates from page 86

### ➔ Finish customisation

Covers available with two finishes: graphite grey and matt chrome-plated.

Option to customise the finishes with your company's corporate colour.

Graphite grey

Matt chrome-plated

Finish customisation

### ENTRY PLATES FOR BOTTOM ACCESS

### ➔ Can adapt to all kinds of furnishings

## K45 OFIBLOCK COMPACT

Simply compact

### MULTIPLE SIDE ENTRIES

- Quick connection
- Direct cable

### SHARES ACCESSORIES WITH K45 OFIBLOCK PLUS

- Desktop
- Under desk
- Raised floor
- Mounted on wall or screen
- Metal surface with magnet

### ➔ Can be installed in a raised floor

Under the floor, install sockets **with indicator lights** to be able to easily locate the connection points.

**Ideal for low-height raised floors**

### ➔ With all necessary materials

Each K45 OFIBLOCK COMPACT is supplied with the section, blind side cover, direct cable entry side cover, hardware and blind front plate, providing space for cables.

Mechanisms, electrical sockets and plates starting on page 86

Easy installation by direct snap-fitting the mechanisms K45

### ➔ Allows quick connection

Optional side cover for quick-connection entry.

## K45 SURFACE AND FLUSH-MOUNT BOXES

Occasional connection

### DOUBLE SURFACE BOX

#### → With all necessary materials

The K45 Surface and Flush-mount box is supplied with a **divider plate**, plugs for fastening and all necessary hardware.

Mechanisms, electrical sockets and plates starting on [page 86](#)

### SINGLE FLUSH-MOUNT BOX

#### → Ideal for deep connectors

The necessary depth is reached by installing a flush-mount box and the surface box.

Especially designed to be able to install FTP and category 7 connectors, where the depth and curvature radius are very critical.

#### → Combine it with the Mini-trunking

The accessories SCM21F/9 and SCM31F/9 allow access by Mini-trunking.

## IP66 K45 WATERTIGHT FLOOR BOXES

For indoor and outdoor use

FOR ELECTRICITY, VOICE AND DATA,  
MULTIMEDIA OR TV AND SAT K45

### Can be installed:

SHOPPING  
CENTRES

CONFERENCE  
CENTRES

HOTELS

HOME

GARDENS

HEALTH  
CENTRES

SPORTS  
CENTRES

MUSEUMS

TERRACES

AIRPORTS

In **open outdoor areas** it is common to require sporadic connections.

When closed, the IP66 protection level keeps water and moisture away from the electrical mechanisms.

A tray for each kind of floor

### Raised floor

### Tiled floor

### IP66 PROTECTION LEVEL

**IP66**

Combine it with the AQUA series of  
**simon**

Consult the SIMON catalogue

## WATERTIGHT BOX FOR RAISED FLOOR

For installation in the **floors of gardens and terraces, wood decks, parquet or raised flooring**

The **beveled tray** fastens the box and hides any installation defects.

Installation using **fastening clips** that anchor the box.

## WATERTIGHT BOX FOR TILED FLOOR

It allows the flush installation of the box in **all kinds of tiled flooring (porcelain tile, terrazzo, ceramic, etc.)**

### ➔ Grouping of watertight boxes

Possibility of grouping the boxes to **have more than one connection point.**

### ➔ A mechanism holder for each environment

**Safety lock**  
Ideal for areas with **public access**

**Manual lock**  
Suitable for less demanding environments

### Two types of finishes

Brass

Stainless steel

### Maximum resistance

When connected, it can withstand the weight of pedestrians while protecting the cable from pressure and stress.

### Safety cover

The **hinge**, which opens to less than 90°, prevents the cover from being left open accidentally and causing people to trip over it.

### Electricity, Voice and Data in a single box

The KSE15U/23/.. mechanism holder incorporates a Schuko electrical connection and an RJ45, CAT5e UTP

### Installation system

An optional drainage pipe can be installed to drain away any possible condensation inside the box. The tray includes a wooden cover that prevents any dirt from getting inside it during installation.

### Protective film

It incorporates a **protective film** to prevent it from getting dirty and damaging the surface of the box during installation.

### Safety lock, opening and closing system

The cover blocking system prevents accidental closing or pinching the cable.

## K45 COLUMNS

Solutions for open areas

### HIGHLY VARIED RANGE

#### Easy to install:

the column is fastened by pressing against the ceiling, without having to drill on a solid floor or slab.

There are 4 different section models according to the number of connection faces, from 1 to 4, on which an unlimited quantity of mechanisms can be installed.

#### Installation mobility

The columns **are fastened by pressing** against the slab. They do not have to be bolted to the floor, and it is therefore very easy to reconfigure the distribution of work stations.

Columns with finishes in white and graphite on page 38

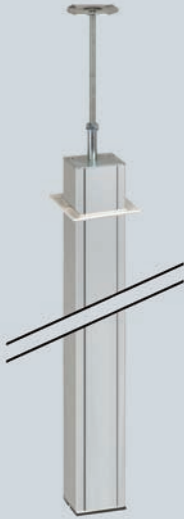

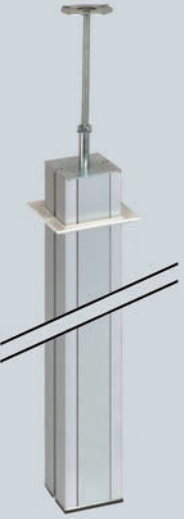

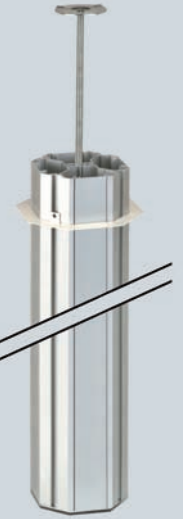

### Supplied with all necessary materials for installation

With a single reference, the K45 columns are supplied complete and ready to be installed: base for attachment to the floor, ceiling trim, telescopic assembly for attachment to the structure, aluminium covers and screws and bolts.

Mechanisms, electrical sockets and plates starting on page 86

## K45 COLUMNS

Reference/finish			
1 face	2 oval faces	2 square faces	4 faces
70x60mm	110x80mm	80x80mm	125x125mm
			
<b>ALK1100</b> /8	<b>ALK7200</b> /8	<b>ALK2200</b> /8	<b>ALK5400</b> /8

## K45 SWITCHING MECHANISMS

Switches, breakers and push-buttons

**16  
A**

### SPECIAL FOR OFFICES

Specially designed for spaces with high density of fluorescent lights, since they support a nominal current of 16A. Recommended for offices, hospitals, conference rooms, etc., since they can withstand the current peaks that are caused.

## K45 ELECTRICAL SOCKETS

Installs with a click

### → Multi-sockets

Multi-sockets can be created using the AC11 connection accessory.

### → High connection density

45° sockets that allow a high connection density.

### → Shutter:

#### Protection

All our sockets include a protective shutter that prevents direct contact with live parts.

#### Selective safety

They protect the UPS line **and allow only computer equipment to be connected.**

### → Quick screw-on terminal connection

Allows 2.5 mm<sup>2</sup> rigid and flexible cable

## A FINISH FOR EACH APPLICATION

**Red finish**, for connecting personal computers using uninterruptible power supply equipment.

**Orange finish** specifically for powering servers or in laboratories.

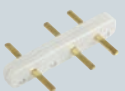

**Green finish** for the health sector

## K45 PROTECTION ELEMENTS

Automatic circuit-breakers and differentials

The K45 plates with protection elements provide **safety** for people against electric hazards and **protection** for installations against voltage surges and overloads.

### ➔ K45 Format

The K45 format differential switches allow them to be installed in surface boxes and K45 flush-mount boxes, and due to their **high 10mA sensitivity**, they are recommended for education centres, schools and day care centres.

### ➔ K45 DIN Format

Assembly in K45 OFIBLOCK, Perimeter trunking, Mini-columns and direct snap-fit K45 columns.

Aesthetic design

### ➔ Assembly sequence of the plate for DIN format elements

1

Clip the DIN guide to the automatic circuit-breaker or differential switch.

2

Clip the assembly to the section or to the perimeter trunking.

3

Fit on the top cover.

## K45 PLATES FOR VOICE AND DATA

We facilitate communication

### Angled plates

The angled plates are ideal for large-size connectors and respecting **curvature radii** in category 6 and FTP cables.

### Flat plates

Flat plates provide full integration in boxes and trunkings.

### We take care of the connectors

Plates with an **automatically closing dust cover** that contribute to keeping the transmission parameters stable.

Marking area or area for attaching the **identification label**.

### Full compatibility

The philosophy of SIMON CONNECT has always allowed incorporating any connector on the market to our coverings.

### 1 connector for various types of patch cords

The RJ11 and RJ12 patch cords connect perfectly to the RJ45 female connectors.

### More Structured Cabling solutions

## K45 PLATES FOR OPTICAL FIBRE

Ready for the future

### ➔ Fibre all the way to the workstation

At SIMON CONNECT® we are one step ahead of the future and have believed in fibre access to workstation terminals for some time now.

We therefore have a broad range of plates for most optical fibre connectors on the market.

Angled plates with the AC80 optical, fibre support winder accessory

### CONFIGURATIONS

Plate mounted with ST connectors and winder support for optical fibre.

Plate mounted with SC duplex connectors and optical fibre winder support.

## TECHNICAL INFORMATION

Plastic parts manufactured using thermoplastic, self-extinguishing, halogen-free materials, which prevent flames from spreading during a fire and guarantee low toxicity in the event that any smoke is released.

### K45 TELEBLOCK

- Product designed according the Safety Requirements of Directive 2006/95/EC (Low Voltage) through compliance with harmonised standard UNE-EN-60.670.
- EC-marked product.
- IP protection level: 4x
- The recommended temperature range during installation is: - 5°C to + 60°C
- The maximum temperature during construction work is + 60°C
- Manufactured in Anodised Aluminium.

### K45 OFIBLOCK PLUS

- Products designed according to the Safety Requirements of Directive 2006/95/EC (Low Voltage) through compliance with standard UNE-20451, equivalent to IEC standard 60670.
- EC-marked product.
- IP protection level: 4x
- The recommended temperature range during installation is: - 5°C to + 60°C
- The maximum temperature during construction work is + 60°C
- Manufactured in Anodised Aluminium.

Input: V = 230 VAC  $\pm$  20% 47÷63 Hz  
Output: V = 5 VDC  $\pm$  10% I = 2 A  
External DC connection: 1 USB-A female port

USB 2.0  
Transmission speed: 480Mbps  
Connection to devices: 4 USB-A female ports  
Connection to PC: 1 USB-B female port  
5 VDC 2A external power supply

Measurements in mm

Single 5-2400 MHz direct TV-SAT socket, made up of:

- One IEC male TV connector, Ø 9.5 mm
- One type-F female SAT connector

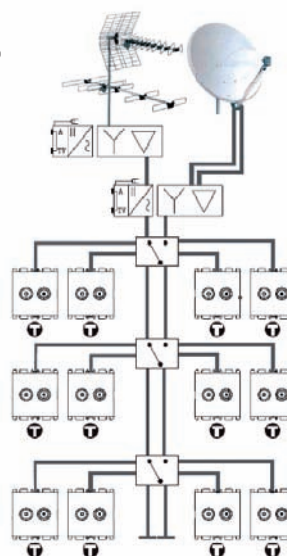

## Technical specifications:

- Tapping attenuation = 2 dB
- Maximum through current = 24 V, 500 mA (\*)
- Accepted cable diameter = 4 ÷ 7 mm
- Operating temperature range = 10 ÷ 55 °C
- According to general standard EN 50083-4
- Male connector according to IEC 61169-2
- Female connector according to IEC 61169-24

(\*) Direct current and control signals (max. 24V 500 mA) are only allowed through the F female connector (SAT).

## Example of TV-SAT installation on one branch

Single socket
